

VCKC KAYAKS

All VCKC single kayaks are in the VCKC clubhouse basement storage area. All, except one of the kayaks are along the west wall (left-hand side after walking through basement door), on the racks in rows 2 and 3. The other single kayak is on the south side of the stairs that lead to the main floor of the clubhouse (right-hand side when approaching the stairs).

The club kayaks are locked by plastic chains and small combination locks. The kayak locker is on the north-east corner (near the bathroom). Combination numbers are available from the kayak booking contact. Please keep all combinations confidential.

NO.	TYPE	WIDTH	LENGTH	SKEG OR RUDDER
1	<u>Blue P&H Capella</u> – a British style sea kayak that is nice to paddle for the day or overnight. Although a narrow boat (fits small person) it is a stable boat. Does have a tendency to weathercock in moderate wind which may be frustrating for a novice paddler.	22"	16'7"	skeg
2	<u>Yellow Current Design Sirocco</u> – a good paddling boat with exceptional manoeuvrability. Has good stability for the novice, but can be edged easily by an experienced paddler. Lots of room for expedition paddling but also makes a great day boat.	23"	16'10"	skeg
3	<u>Yellow Boreal Design Inukshuk</u> – a comfortable boat to paddle with lots of room for gear. Has good initial stability for the novice paddler but may feel a little tippy if edged by an inexperienced paddle. Its low rocker tends to make this boat track very well, but makes it a boat that has a larger turning radius.	23.5"	17'	rudder
4	<u>Necky Kyook</u> - rotomoulded polyethylene hull construction is able to take bumps and scrapes in its stride. At a length of 15 feet and 63.5cm at the beam, its stability is high, manoeuvrability responsive and its low profile means that side winds have very little effect.	25"	15'	rudder
5	<u>Atlantis Mist</u> –the only fibreglass kayak in the club fleet, so take extra care with it. A responsive boat with good secondary stability, good for a more advanced paddler, but fine for beginners.	22.5"	16.5'	rudder
